

How To Get Paid With Online Surveys

Contributed by Webmaster

By keishon martin

The income potential from taking surveys should be in the range from \$500 to \$5,000 dollars a month depending on how many you can complete. But firstly, just like with any business venture, for you to make money online you need to be organized. Here are 4 important steps to help you get started:

1. Set Up A Seperate Email Account

You'll want to have a separate email account as you will get a LOT of new emails. So set up a seperate free email like Yahoo or a Hotmail account and use it for your business opportunities. New email accounts are easy to setup and this will make managing and monitoring things a lot easier. If you do want to make money online then you will need to be organized.

2. Check your email regularly For new oppourtunities

If you are serious and want to make money online from taking surveys, then you must check your email at least once or twice A day. You wont want to miss any chances to make money. The market research companies will stop sending you survey opportunities if you are slow to respond, never respond, or if their notifications are returned as undeliverable. But, thats not to say you have to take part in all the surveys that you get offered. It is entirely up to you which of the survey opportunities you act on.

3. Clear Your Inbox Regularly

If you are to make money online then you must keep your email inbox clean and able to receive email survey opportunities at all times. Having a separate email account will make this job easier and help you to stay organized by keeping your survey opportunities separated from your other emails.

4. Dont Block New Opportunities

This might sound a little bit strange, but you should TURN OFF your spam blocker for this particular email account. Spam blockers will keep some emails for good survey opportunities from reaching you. The problem is that this will happen invisibly and you wont ever know that you missed the chance. Losing even ONE survey opportunity could be a lost chance to make money online.

Keep in mind that the chances are high that even some of the good companies will tend to send unwarranted emails that could be considered SPAM.

Despite that one little negative, the problems associated with cash paid surveys are only minor when compared to running a regular business. The main thing is to be organized so you can minimize or avoid any potential problems.

There are lots of excellent paid survey opportunities and they ARE a quick and easy way to make money online.
